

Serial No.: 09/872,769
Filing Date: May 31, 2001

IN THE CLAIMS:

Please cancel claims 2-3, without prejudice or disclaimer.

Please amend the claims as follows:

B¹

1. (Twice Amended) A method of treatment of a host with a cellular proliferative disease, comprising contacting said host with a composition consisting essentially of a pharmaceutically acceptable dianhydrogalactitol or an analog thereof, and a pharmaceutically acceptable antiproliferative agent, each in an amount sufficient to modulate said cellular proliferative disease, wherein said antiproliferative agent is selected from the group consisting of antimetabolites, structural protein agents, agents that affect protein synthesis, antibiotics, hormone antagonists, intercalating agents, topoisomerase inhibitors and metal coordination complexes.

B²

4. (Twice Amended) The method according to claim 1 wherein said antiproliferative agent is an intercalating agent.

5. (Twice Amended) The method according to claim 1 wherein said antiproliferative agent is a metal coordination complex.

6. (Twice Amended) The method according to claim 1 wherein said antiproliferative agent is cisplatin.

7. (Amended) A method according to claim 1 wherein said dianhydrogalactitol or analog thereof is administered before the administration of said antiproliferative agent.

8. (Amended) A method according to claim 1 when said dianhydrogalactitol or analog thereof is administered during the administration of said antiproliferative agent.

9. (Amended) A method according to claim 1 wherein said dianhydrogalactitol or analog thereof is administered after the administration of said antiproliferative agent.
